LOW LEVEL CISTERNS

ASSEMBLING SIPHON

1. Push the siphon washer over the threaded tail of the siphon.
2. Push the threaded tail down through the outlet hole in the base of the cistern (making sure that the siphon washer is on the inside of the cistern).
3. Put the backnut over the protruding threaded tail and hand tighten back-nut.
4. Finally tighten further 1/2 turn using a spanner.

ATTACHING THE FLUSHPIPE

5. Place the coupling nut, followed by the sealing washer onto the flushpipe.
6. Insert the flushpipe into the tail of the siphon (35mm maximum) and hand tighten the coupling nut.

CLOSE COUPLED CISTERNS

After completing stage 1 as for low level cisterns place the close coupling plate over the threaded tail of the siphon, before completing stages 3 and 4.

Place the plate over threads of the siphon, secure hand tight using back-nut provided as shown in picture 'E' & tighten further half turn using a suitable spanner.

METRO SIPHON TROUBLE - SHOOTING

Question - WHY WON'T THE SIPHON FLUSH OR FLUSH ONLY WHEN I PUMP THE HANDLE

Answer - CHECK THE QUICK RELEASE NUT IS FULLY TIGHTENED

Answer - CHECK THE SIPHON DIAPHRAGM WASHER IS FLAT TO THE PISTON BASE AND IS NOT TORN OR DAMAGED.

Answer - CHECK THE SEALING WASHER IS NOT KINKED OR TRAPPED
